PACCAR

Dear Hiring Manager,

Hope you're doing well! I'm thrilled about the Cloud Services Intern role at PACCAR, and I'd love to bring my tech enthusiasm to your team.

At QualStream, I dove into data pipelines, ETL processes, and cloud deployments using Python. I love untangling the complexities of Cloud Computing, from AWS to Azure.

Studying at Sacred Heart (GPA: 3.9/4.0), my toolbox includes C, C++, MATLAB, and Python. But, I'm not just code—I thrive in collaborative environments, as seen in virtual internships in software engineering and data visualization.

I've got a passion for innovation, and I'm stoked about the chance to contribute to PACCAR's success. Let's chat and see how my vibe fits with your awesome team.

Thank you!

Sincerely,
Pradyumna Sutar
